GARC Newsletter

Graphic Arts Patent Abs published monthly, lists abstracts selected from Gazette, United States. A typical 180-page issue includes over 600 abstracts under the sections: Substrates; Inks; Pigments; Packaging; Photographic Equipment and Computer Graphics. Due to its proprietary deal of important information, graphic arts exists only in literature. GAPA reports information in suitable categories, as well as providing a convenient index. Where suitable, charts are included for clarity.

An alphabetical Name Index provides direct access to applicants and their affiliations and to the inventors or industries assigned patents. This index makes it easy for anyone to quickly find all of the patents that have been issued to individual or company.

Graphic Arts Literature Abstracts

Each abstract is accompanied by an appropriate reference in photocopies of all articles available from the Information Clearinghouse for a nominal fee.

Also included in the Annual subscription: $1 U.S. and Canada; $28.5 for teachers

Quality Control Tools for Arts. This chart lists 25 control devices, charts, and objects together with information about their applications on a 405 x 580 mm foldout chart. Quality Control Tools for Arts.

This chart lists 25 control devices, charts, and objects together with information about their applications in format, cost, and distribution.

Graphic Arts Literature

*Graphic Arts Literature Abstracts* is a monthly publication which provides informative abstracts of current literature of interest to graphic arts managers, researchers, and educators. An expansion of the 20-year-old Graphic Arts Index, GALA summarizes new developments as they appear in approximately 200 publications, both foreign and domestic, which are received each month at the Information Service. For ease of use, the abstracts are organized, together with appropriate reference information, into 10 major categories which cover the printing and publishing industry; managerial viewpoints for all phases of printing plant operations; processes, machines, equipment, and materials for composition, preparatory operations, and the reproduction and finishing stages; and graphic arts research and education.

**Annual subscription**

Each abstract is accompanied by appropriate reference information, and photocopies of all articles listed are available from the Information Service for a nominal fee. Also included in the bibliography is a 405 x 580 mm foldout chart of Quality Control Tools for the Graphic Arts. This chart lists 25 control devices, charts, and test objects together with information about their applications and use, format, cost, and distributor.

Graphic Arts Patent

The GARC Newsletter is a four-to-eight page monthly publication which reports to readers in the graphic arts industry the wide variety of activities and interests at the Graphic Arts Research Center. Illustrated with photographs, the Newsletter includes current events at GARC, interviews, comments, letters, and other material which provides a cross-section of ideas in graphic communications.
